DETAILED ACTION

Response to Amendment

1. The response filed July 2, 2007 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "seal...integral to ...the...nozzle body member" recited in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 3752

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. Claim 2, 8, 13, 14 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2, 8 and 13 recite "wherein said seal comprises ribs on said conduit." Their parent claim 1 recites "a seal...integral to at least one of the conduit and nozzle body..." Claims 2, 8 and 13 are indefinite where claim 1 defines a seal integral to the nozzle body.

Claim Rejections - 35 USC § 102

5. Claims 1, 3, 5-7, 9, 11, 12, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Hinchman (2,517,877).

Hinchman discloses an adjustable gas nozzle comprising: a nozzle body member 8; a conduit 7; an adjusting member 25, 26 having a first end 25 with a first restricted orifice (orifice of 29 upstream of 27) and a second end 26; a second orifice 33; a first passageway 29,33; a coupling 16; a by-pass passageway 18; cooperative surfaces 19, 27; cooperating means 12, 32; a seal 15.

Claim Rejections - 35 USC § 103

6. Claims 1, 3, 5-7, 9, 11, 12, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ridenour (5,025,990) in view of Ito (4,432,496).

Ridenour discloses an adjustable gas nozzle comprising: a nozzle body member 12; a conduit 13; an adjustment member 14; a coupling 13 (threads); a by-pass passageway 35; cooperative surfaces 22,25; cooperating means 31, 32.

Ridenour differs from what is being claimed in the seal being distinct from the coupling. Ito teaches an integral seal 28 between the conduit 27 and nozzle body member 41. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided the seal of Ito to the device of Ridenour to prevent accidental removal of the nozzle body member.

7. Claims 1-3, 5-9, 11-14 and 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ridenour (5,025,990) in view of Hollinshead et al. (6,164,569).

Ridenour discloses an adjustable gas nozzle comprising: a nozzle body member 12; a conduit 13; an adjustment member 14; a coupling 13 (threads); a by-pass passageway 35; cooperative surfaces 22,25; cooperating means 31, 32.

Ridenour differs from what is being claimed in the seal being distinct from the coupling. Hollinshead teaches an integral seal ribs 104 on conduit 66 distinct from coupling 84. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided the seal ribs of Hollinshead to the device of Ridenour to improve the seal.

Response to Arguments

8. Applicant's arguments filed July 2, 2007 have been fully considered but they are not persuasive.

Applicant argues that the drawing objection should be withdrawn in light of the disclosure in paragraph 15. Applicant's argument is further evidence that the drawings do not show the claimed features. Paragraph 15 and the drawings disclose that seal (ribs or ridges 50, 52) is integral with the conduit 12. There is no showing of the seal being integral with the nozzle body member 14.

Applicant argues that the rejection of claims 2, 8 and 13 under 35 U.S.C. 112 is improper and request sections of the MPEP for its application. Claim 1 presents an alternative expression, "...a seal...integral to at least one of the conduit and nozzle body member..." The expression can define the following alternatives:

1. the seal is integral to the conduit
2. the seal is integral to the nozzle body
3. the seal is integral to the conduit and the nozzle body

See MPEP 2173.05(h) for alternative limitations. Therefore, when claim 1 defines the seal being integral to the nozzle body, claims 2, 8 and 13 are definite because they define the seal being on the conduit. If applicant maintains that the seal can be integral with the nozzle body and the seal are ribs on the conduit, such an assertion would merit a non-enablement rejection under 35 U.S.C. 112, first paragraph.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
